*Omni Park Healthcare launches new website to
enhance service needs of valued clients*

Beginning Monday, October 22, 2012, clients and caregivers can receive more support and information with the click of a mouse on the new Omni Park Healthcare website. For more than a decade, Omni Park Healthcare has served the convalescent needs of inner-city seniors. The new website has been re-engineered with a fresh look, enhanced features, drop down menus and easier use for web visitors.

“Our new website raises the bar for home health-care organizations by making essential resources available to seniors, caregivers and healthcare professionals,” said Terry Maynard, chief executive officer of Omni Park Healthcare. “We add value to the delivery of care by placing it at the fingertips of our website users,” he added. The website features critical links to agencies that address geriatric issues.

Because Omni Park Healthcare provides many services to a diverse client base, the website also features multiple language capabilities. The site provides translation into 52 languages. Clients can also link pages to Facebook and Twitter via the new website.

The new website which can be found at: <http://omniparkhealthcare.com>, was developed by Media Creations Group of South Euclid, Ohio. “We believe we have a site that is easier to navigate for our visitors and is comprehensive and visually appealing.” said Maynard.

Omni Park Healthcare is eager to hear feedback from users during the soft launch period. Maynard plans for Omni Park Healthcare to incorporate suggestions deemed feasible. “Our goal is to provide the best user experience possible.” Omni Park Healthcare, the largest provider of home care services to Cleveland’s inner city seniors, is a Medicare-certified, locally-owned business since 2002.

Omni Park Health Care is an equal opportunity employer.
